Skills Summary

Seasoned Engineering Leader with over 22 Years of experience, specialized in validating **Distributed, Virtualized, Storage and Network Infrastructure Systems**. Including over 4 years as a **Quality Engineering Leader** managing System Test team of over 10 engineers across geo both in India and the US. Strong Experience in **Architecting Python Automation frameworks**. Function as a technical lead on projects working collaboratively with Development during all stages of the Project. Define Scope and objectives of all levels of QA Testing, establishing purpose and deliverables of Test Efforts.

Education

- Bachelor of Engineering (Electrical and Electronics) | 1998 - 2002
Sree Ramakrishna Engineering College, Coimbatore, Tamil Nadu, India
- Cisco Certified Internetwork Expert - Data Center (CCIE DC - #46070) - Expired

Experience

Nutanix India, Bangalore, India

Senior Manager, Engineering | Mar 2022 - Till Date

System Test Flow (Virtual Networking and Network Security)

- Manage System Test Team of 10+ Full-time Engineers and 2 Contractors across timezones - Bangalore, Pune and San Jose.
- Built the team ground up from Hiring, Mentoring and Ramping up the team to take up the challenging features in **Flow Virtual Networking** and **Flow Network Security** areas in the Product.
- Delivered quality releases on time, with **Automation** first testing approach, constantly engaging and collaborating with Release Management, Program Managers, Development Management and Product Managers.
- Enabled Team to adapt AI in different stages of Testing cycle from Test Planning, Code Development, Code Reviews, Test Triaging and Debugging.

(KVM, OVS, OVN, FRR, Python, RESTful API, Docker, Kubernetes, GIT, Gerrit, Jira, Confluence, AI)

Nutanix Inc, San Jose, California

Staff Engineer | Dec 2015 - Mar 2022

System Test Prism Central Product

- Prism Central is a Virtual Appliance to manage multiple AOS Clusters from a Single pane. Qualifying Prism Central involves **RESTful API testing, UI**, Performance, Scale, Load and Stress Testing with large number of Virtual Machines with different workloads deployed on the AOS Clusters.
- Primarily Role involves **Test Plan** creation, designing and developing **automation and test execution** for new features.

- Some key features delivered include Xi Control Plane, **Microsegmentation**, Different **RBAC** Features like Self Service, Category Based, Cluster Based, and Prism Central **Disaster Recovery** System Testing.
- **Architect Python based Automation framework** to test RBAC which covers over 1500+ API end points with complex RBAC policies supported by the Platform.
- Test lead for Qualifying features for timely release with high quality for pleasant customer experience.
- Work with developers to identify and solve **performance** bottlenecks.
- Mentor team member and guide on **System testing** the product in a complex environment. Help with debugging issues in the product and clarify on different technologies.

(Python, RESTful Api, KVM, VMware ESXi, Docker, Kubernetes, OpenSSL, GIT, Gerrit, Jira)

Cisco Systems, San Jose, California

QA Engineer | Feb 2013 - Dec 2015

QA **Nexus 5K|6K|2K** hardware platforms and Unified Computing System (**UCS**) manager.

- Create test plans, manual testing various UCSM features. Create automation scripts for test execution.
- Build Test lab topologies with different family of hardware including Nexus 5K, Nexus 2K , UCS with VmWare ESX Hypervisor, vCenter, IXIA and Perform functional testing.

(Python, RESTful API, VMware ESXi, vCenter, NetApp, OpenFiler, EMC, Ixia, Pagent)

Glow Networks Inc, Richardson, Texas

Network Consulting Engineer | Nov 2011 - Jan 2013

- LTE Lab build for AT&T. Building lab engineering plan, Routing Design, Documentation, Unit Testing, Integration Testing and E2E Testing Support.
- Lead the project to build Interexchange Carrier (IXC) Zone which will support Inbound Roaming. Zone includes Nexus7010, 7606-S, Juniper SRX5500, BIG IP F5 and IPS. Involved from Zone Design, Build, Unit and Integration Testing. Support during end to end testing.

HCL Technologies, Chennai, India

Senior Technical Lead | Jun 2004 - Nov 2011

- Responsibilities include **Feature Design and Development, Sustaining** and Support in **RIP, Policy Based Routing and CDP** components of Cisco IOS.
- Initial 4 years, **Test lead ** for the team which performs extensive testing on **IP Multicast and Quality of Service**. Perform Regression testing, file tickets and work with developers to fix bugs.

(Cisco IOS, C, TCL, Perl, IP Multicast, QOS)

Unity Electro Systems [P] Ltd, Coimbatore, India

Network Support Executive | Feb 2003 - Jun 2004

- Design and Implement **Linux** based solutions as per customer requirements. Which involves configuration and maintenance of **Linux based Servers** [File, Web, Mail, DNS, and FTP], Firewall and Software Routers.
- Design and implement LAN/WAN for SOHO networks with CISCO **Routers and Switches**.
- Provide **Wireless** solutions for Enterprises using Cisco Aironet bridges.
